## ERD Diagram For News

For news feature I don't have any other table because any one can see the news when they visit a website and otherwise only admin can do CRUD.

## ERD Diagram for find Doctor

Find a doctor feature have only one table of doctor's detail because Every one can visit the website and find particular doctor and their details. If they are Registered with that then they can select a doctor and click on book an appointment then i need another table but for this feature only doctor table is needed.
